

Our ramp evaluation specialists will visit your home for an on site detailed evaluation, and will discuss your ramping options. Modular ramps are custom quoted and built specifically for installation in your home. We can work with you to find the appropriate configuration that will balance cost, aesthetics, and safety.

## MODULAR RAMPS

**Our aluminum modular ramp systems** are built to address the accessibility needs of the residential and light commercial market. We have created a whole new concept for designing, ordering, and installing the perfect modular ramp system.

- Easy installation. Install a 24' system, including handrails, in less than 30 minutes!
- Sides are finished and flush, with no hazardous nuts or bolts protruding onto the usable ramp area
- Configure a ramp system for almost any site
- Handrails improves grip and ensures superior appearance
- Ramps and platforms made of lightweight aluminum
- Ramps, handrails, and platforms are pre-assembled
- All components feature captured fasteners
- No anchoring into concrete footings or pads is required
- Architecturally designed for a clean, modern appearance
- Extruded skid resistant surface
- Low maintenance
- Integrated independently adjustable supports
- 36" width
- 850 pound weight capacity

## THRESHOLDS

We carry a variety of threshold solutions for your home. Thresholds help you to navigate you wheelchair, power chair, or scooter over uneven surfaces such as doorway thresholds or small steps.

## PORTABLE & SUITCASE RAMPS

Portable wheelchair ramps are a durable yet inexpensive alternative when a permanent ramp is not feasible or available. Most are designed for quick and easy use with scooters and all wheelchairs.

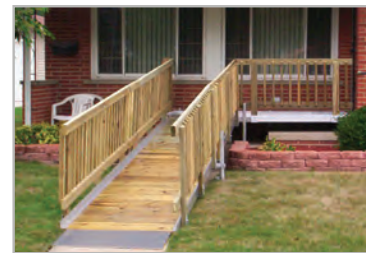

The TRIFOLD Advantage Series portable wheelchair ramp, with its unique 3-fold design, offers the length required for wheelchairs and scooters to easily access steps, vehicles, and raised landings. The ramp is designed to be used and carried as a set, or if desired, can be quickly separated into two individual sections, making it even easier to use, carry, and store. By simply removing two hinge pins, the TRIFOLD Advantage Series ramp quickly separates into two lightweight halves, each with their own carrying handle. These ramps feature an 800lbs. capacity, aircraft grade aluminum construction, and non-slip grip tape surfaces.

101 Mobility also carries single-fold ramps which provide the safety and strength required, while remaining lightweight and portable. The smooth and quiet action of the living hinge, a continuous full length low profile hinge, adds strength and stability to the ramp. Features an extruded non-skid tread for superior traction, and a self-adjusting bottom transition plate for easy conversion from ramp to ground. Welded construction provides long-term durability and safety.

## EFFICIENCY MODULAR RAMPS

101 Mobility also carries cost-effective wooden and aluminum modular ramp systems that are both durable and sustainable. These modulares can be easily removed without leaving a footprint, and reused time and time again. The treated wood requires similar maintenance to your wooden deck or porch at home, and adds a more natural appeal. These ramps are fully customized to your specific needs.

Modular ramps are custom quoted and built specifically for installation in your home. We can work with you to find the appropriate configuration that will balance cost, aesthetics, and safety.

Our certified local installers ensure that all ramps are installed per the manufacturers specifications and with quality and safety in mind.
